

Space Miles

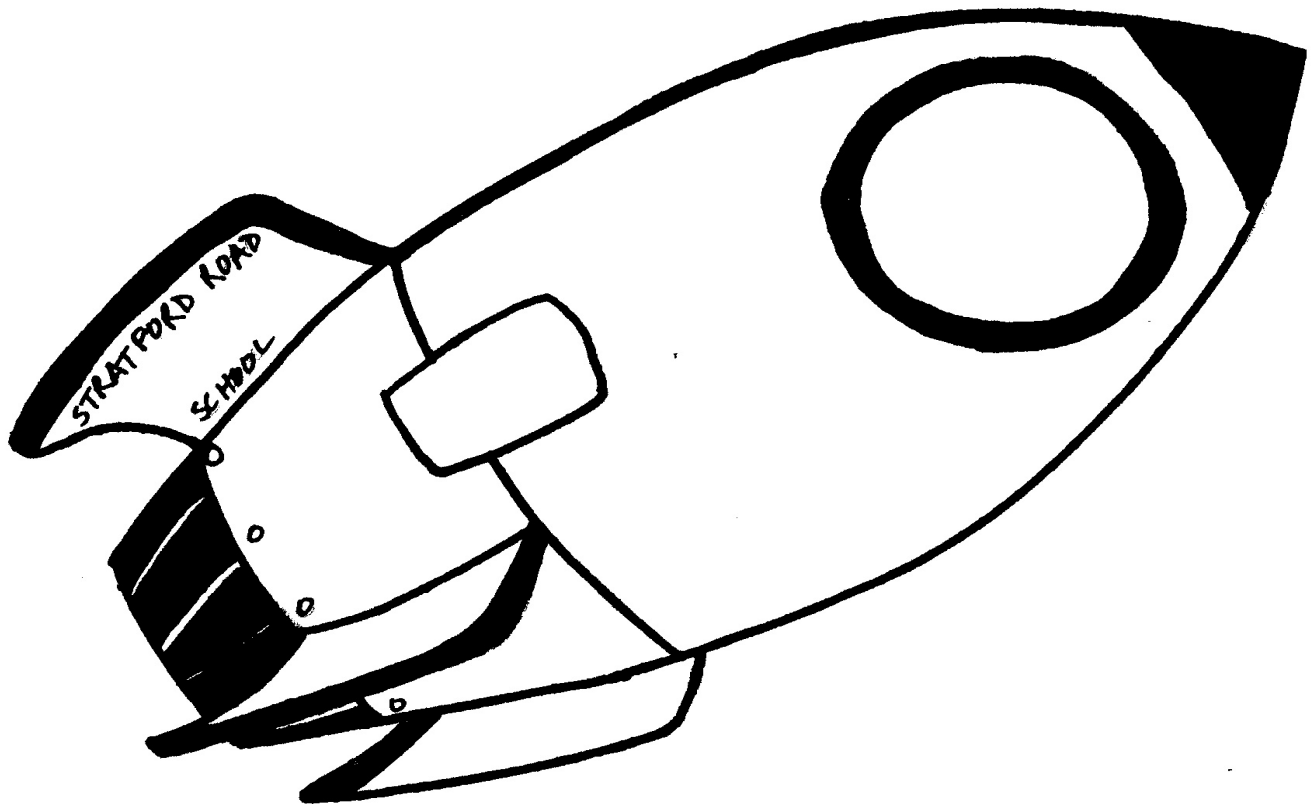

Our rocket will travel through space to all the planets and back again to Plainview based on the minutes you read every night during PARP week and send in on the rockets that we have included in this packet.

For each minute that you read our rocket will travel 1 mile.

If the school reads 10,000 miles each child will receive a special PARP prize.

Please cut out the enclosed rockets and color them in! Then on the back of each rocket, indicate your name, the title of the book or books you read, and how many minutes you read for.

We will tally the minutes each day and keep you informed of where we travel through space.

Reading is out of this World!

PARP 2009
